

AIFI · SYNCHRONISED AUDIO FOR MUSIC

EVERY PHONE IN THE ROOM, ONE SHARED SOUND SYSTEM.

AiFi turns the phones a group already has into one synced sound system for music. No new hardware, no app to install. Open it in a browser, scan a QR, and everyone in the room hears the same track at the same instant.

ONE CORE EXPERIENCE, EVERY WAY TO USE IT

THE CORE PRODUCT

AIFI LISTEN TOGETHER

Listening becomes a shared moment again.

One tap brings the phones in a room into a single synced sound system, so a group listens together in person, same song, same instant, filling the space. People who listen together stay longer and bond with the app. This is the heart of AiFi, and everything else is built on it.

THE GROWTH ENGINE

Every invite to join the sound pulls in another person. Anyone nearby joins by scanning a code, no app to install, and the non-users among them discover the service in the moment, turning word of mouth into a measurable channel of new users.

THE SAME TECHNOLOGY, MORE WAYS TO USE IT

AIFI QUIZ

A live music game you play together.

A track plays and the room races to name the song, the artist or the year, each on their own phone in perfect sync. Listening turns into a game, and a reason to open the app every day.

AIFI DROP

Superfan parties, with a moment to sell.

Synced first-listens and album-drop parties, the superfan moment artists and labels want to own. Every phone is session-aware, so at the peak you can surface a perfectly-timed ticket or merch offer. **AiFi is the social experience that makes a superfan or premium tier worth paying for.**

AIFI BLEND

Everyone's taste, every phone in sync.

All the phones in the room lock into one synced session, and everyone's listening blends into a shared mix the whole group will like. The picks play across every phone at the same instant, so a get-together becomes live, in-person discovery and more streams.
